

Pentathlon Canada National Team Standards

Pentathlon Canada's National Team Standard consists of a full pentathlon competition score equal to or exceeding a score of 1200 pentathlon points for women or 1300 pentathlon points for men.

Any sanctioned competition (UIPM or Pentathlon Canada) in which an athlete exceeds or equals the required number of points will qualify that athlete for national team status.

Any competition result in 2016 will qualify an athlete for 2017. Qualification must be renewed annually, with a qualifying score expiring one year to the date after which it was attained.

NATIONAL TEAM QUALIFYING SCORES

MEN TOTAL = 1300 Points

WOMEN TOTAL = 1200 Points

Points must be accumulated at one competition. Results from different competitions cannot be selected and combined to make a national team standard.

All athletes must have a UIPM riding certification, as outlined in the INP. Youth A athletes and younger may not compete at senior world championships or senior world cups.

Junior athletes may compete at senior world championships and senior world cups, provided that they also compete at junior world championships. If a junior athlete does not compete at junior world championships, that athlete cannot compete at senior world championships. If the athlete was formally excused from Junior World Championships the athlete can compete at senior world championships and world cups provided they have approval from the Pentathlon Canada Selection Committee.

All athletes attaining national team status must compete at the Canadian national pentathlon championships.

The result of Canadian nationals (starting in 2017) will determine ranking for athletes on the national team. Ranking will determine priority in choosing which competitions to attend.
